

## THE CRYOVIAL FAMILY

### Reaching the highest levels of quality

The Simport Cryovial® Family is the most complete line of cryogenic vials available today. Designed for storing cells, blood, serum and other biological fluids at temperatures as low as  $-196\text{ }^{\circ}\text{C}$ , these sturdy polypropylene vials offer a high level of chemical resistance.

As described in the following pages, they are available in 3 different configurations and in 5 sizes from 1.2 ml to 5 ml. A large white marking area and printed graduations facilitate sample identification. Some models are free-standing while some others have only a round bottom. Self-standing vials have a locking base allowing opening and closing with only one hand while vials are used with the Simport Workstation.

One important feature in the Simport Cryovial® design is being able to manufacture both the tube and cap from the same plastic, ensuring the same expansion coefficient, therefore a lasting seal.

Color coding is made easy simply by inserting a Capinsert™ in the cap. A choice of 11 colors is available.

Five models of Storage Boxes are available to accommodate 25, 81 or 100 Cryovial® tubes of all sizes. These boxes are made of polycarbonate for high mechanical strength and resistance to extreme temperature changes.

#### CRYOVIAL SPECIAL PACKAGING

Tamperproof tear off seal ensures sterile product integrity

Bag can be resealed as often as needed

**WARNING:** Do not use Cryovials for storage in the liquid phase of liquid nitrogen. Such use may cause entrapment of liquefied nitrogen inside the vial and lead to pressure build-up resulting in possible explosion or biohazard release. Use appropriate safety procedures when handling and disposing of vials.

### CANE for CRYOVIAL® TUBES

Made of aluminum

For storage of up to five 1.2 or 2 ml **Simport** Cryovial® tubes in liquid nitrogen containers such as Dewar flasks.

Cat. #	Length	Qty/Pk	Qty/Cs
T313	290 mm (11 5/16 in.)	12	48

## T315

### CRYOVIAL® WORKSTATION RACK

Made of polypropylene

This handy autoclavable rack can hold up to 50 cryogenic vials. Now with one hand, you can easily unscrew a **Simport** Cryovial® closure. Thanks to an innovative universal locking system, the vials will securely lock in each well and will not turn. Each position is identified with an alphanumeric index. Strong handles make it easy and safe to carry. It is supported by five anti-skid rubber feet. The rack is compact and stackable. Available in three attractive colors.

Size: 10 cm x 20 cm x 25 mm H. (4 x 8 x 1 in. H.)

Cat. #	Color	Qty/Cs
T315-2	Blue	4
T315-3	Red	4
T315-10	Lilac	4

Now, with only one hand, you can easily unscrew a **Simport** Cryovial® closure. Thanks to an innovative universal locking base, the vials will securely lock in the wells of just about any rack on the market. This newly designed feature is available on all **Simport** self-standing Cryovial® tubes.
